

Langchain RAG Tutorial

Install dependencies

requirements.txt

1. Do the following before installing the dependencies found in requirements.txt file because of current challenges installing onnxruntime through pip install onnxruntime.

Included other necessary dependen...

o For MacOS users, a workaround is to first install onnxruntime dependency for chromadb using:

conda install onnxruntime -c conda-forge

See this thread for additional help if needed.

- For Windows users, follow the guide <u>here</u> to install the Microsoft C++ Build Tools. Be sure to follow through to the last step to set the environment variable path.
- 2. Now run this command to install dependenies in the requirements.txt file.

pip install -r requirements.txt

2 months ago
